PROFESSIONAL EXPERIENCE

Securitas Direct

Backend Lead

Mar 2023 - Present

Madrid, Spain

- Led the end-to-end modernization of a legacy platform, migrating from a Java wrapper to Java 17 microservices, ensuring long-term scalability.
- Delivered massive performance improvements, reducing critical query times from 3 minutes to just 12 seconds by introducing Redis caching and advanced query optimization.
- Reduced technical debt, through the elimination of boilerplate, strict application of SOLID and clean coding practices.
- Improved test coverage from 0% to 80% in SonarQube with a robust automated testing strategy, significantly increasing system reliability.
- Strengthened security and architecture, implementing a decoupled multi-module hexagonal architecture and ensuring compliance by passing Fortify security validations.

Geoportail

Full Stack mid developer

Oct 2021 - Mar 2023

Liron, France

- Contributed to the enhancement of the French Geoportail platform, developing new features in a full-stack environment with Java 17, Spring Boot, JPA, MongoDB, and Angular
- Implemented critical features, including aerial image uploads to Amazon S3 storage, integration of Python-processed geospatial data into MongoDB
- Strengthened delivery pipelines, configuring and maintaining GitLab CI/CD workflows and supporting deployments through Rancher, ensuring reliable and automated releases.
- Led onboarding and mentoring of junior developers, ensuring knowledge transfer, coding best practices, and smooth integration into the team.
- Centralized observability and monitoring, consolidating logs with Elasticsearch, creating Kibana dashboards and automated hooks, and performing testing with Grafana.

Renfe

Junior Java Developer

Sep 2020 - Oct 2021

Madrid, Spain

- Maintenance and evolution of a service with over 500,000 daily passengers and sustaining hundreds of thousands of daily web and app accesses.
- Provided incident support and evolutionary maintenance, ensuring stability and continuous improvements in a high-demand production environment.
- Delivered a new ticketing and claims microservice built from scratch under an API-First approach, replacing the legacy paper-based yellow forms with a fully digital workflow.
- Strengthened collaboration across teams, contributing to design discussions, testing strategies, and smooth integration of new features into Renfe’s microservices ecosystem.

EDUCATION

Advanced Degree in Multiplatform Applications Developement

CPiF Los Enlaces

Sep 2019 - Sep 2021

Zaragoza, Spain

Bachelor's degree in Computer Science

IES Jeronimo Zurita

Sep 2017 - Jun 2019

Zaragoza, Spain

PROJECTS

Experience-Now (MotoGP & Estrella Galicia)

Backend Developer

- Contributed to the backend development of Experience-Now, a MotoGP mobile application in partnership with Estrella Galicia, focused on VIP user management.
- Designed and implemented backend services using AWS Lambda, leveraging Gateways and Request Handlers for scalable and serverless execution.
- Created and managed the database schema and tables in Amazon Aurora, ensuring structured data storage and efficient access for VIP user operations.

Cierzolgtb.org

End-to-End Developer

- Designed, built, and deployed the full web platform independently—including frontend, backend, payment integration, hosting, and overall architecture.
- Implemented secure user authentication and online payments, used by hundreds of participants to register for an international volleyball tournament in Zaragoza.
- Developed an intranet for organizers to manage resources, monitor registrations, and streamline event logistics

Elisandesign.com

End-to-End Developer

- Created and deployed a modern portfolio website for a designer, focusing on innovative, dynamic, and fresh visual design.
- Implemented smooth animations and interactive UI to enhance the user experience and highlight the client’s creative work.

SKILLS

- **Programming Languages:** Java, SQL, Angular, React, Python, HTML/CSS/JavaScript , Typescript.
- **Frameworks and Libraries:** SpringBoot, JPA, Spring Security, MapStruct, Liquibase, Webflux
- **Database Technologies:** OracleDB, MongoDB, PostgreSQL.
- **Quality Assurance:** JUnit, Mockito, Selenium, Scala, Sonar.
- **Architecture:** API Gateway, Hexagonal Architecture, MVC, Event-Driven Architecture, Reactive
- **Others:** Gitlab, Docker, Kafka, Jenkins, Maven, Docker, Kubernetes, AWS, RabbitMQ.
- **Languages:** English (Professional proficiency), Spanish (Native speaker), French (Basic profiency)
